Kabeer Ahmad

Software Engineer | Full-Stack & Applied AI | LLM Integration, AI Agents & Automation
Lahore, Pakistan | kabeeahmad.ka@gmail.com | tech-with-kabeer.vercel.app | https://linkedin.com/in/kabeer-ahmad/

EXECUTIVE SUMMARY

Software engineer specializing in full-stack development and applied AI. I turn LLMs, open-source models and automation into production-ready products.

PROFESSIONAL EXPERIENCE

Associate Software Engineer - Innovage.io – Lahore | Jan 2026 – Nov 2026
- Built React Native mobile apps for Innovage's own product line. I added on-device AI with Apple Intelligence and LLM APIs for features such as smart suggestions and content generation.
- Rebuilt a client's legacy .NET portals as modern React and Node.js applications, which improved speed, usability and maintainability.
- Designed business automations with n8n and Python, including AI voice-calling agents, that took repetitive work off team's hands.
- Worked across the full stack from UI to APIs and databases, shipping features from idea to production

Software Engineer & Founding Member - Stylique Technologies – Lahore | Mar 2025 – Jan 2026
- Developed a virtual try-on pipeline using custom diffusion models, DensePose, and SCHP to deliver photorealistic inference for B2B clients.
- Selected for the **LUMS LCE Idea Launch** incubation program and subsequently incubated at the **National Incubation Center (NIC)**
- Led end-to-end development from R&D to production, optimizing heavy GPU workloads and building a scalable Shopify integration.

Software Engineer Intern - PureLogics – Lahore | Apr 2025 – July 2025
- Wrote clean and reusable Python code, and participated in agile sprints, code reviews, and debugging sessions to optimize system performance.
- Worked closely with frontend teams to integrate APIs and ensure smooth, secure user interactions.

Full Stack Development Intern - CodeAlpha – Lahore | Sep 2024 – Oct 2024
- Built and optimized web applications using React.js, Next.js, and Node.js, enhancing both front-end and back-end functionalities.
- Applied JavaScript and database management skills to develop high-performance applications while collaborating with experienced professionals.

Software Quality Assurance Intern - 10Pearls (Remote) – Lahore | Jun 2024 – Aug 2024
- Designed, executed, and managed comprehensive test cases for software applications, ensuring high-quality deliverables. Conducted API testing using Postman, functional testing, and bug tracking to enhance software reliability.
- Utilized Selenium WebDriver, Cypress, and JMeter for automated testing and performance optimization.

Unity Game Development Intern - Mindstorm Studios (Remote) – Lahore | Jun 2024 – Aug 2024
- Developed and optimized interactive 3D games using Unity and C#, and Assisted in designing intuitive user interfaces for smooth game flow.

Full Stack Development Intern - Entracloud (Remote) – Lahore | Jun 2024 – Aug 2024
- Worked on full-stack web applications utilizing Node.js, React, and MongoDB, along with REST APIs and authentication systems.

EDUCATION

BS, Computer Science
FAST - NUCES Lahore | 2021 - 2025
CGPA: 3.63

LANGUAGES

English | Advanced
Urdu | Native

PUBLICATIONS

Scalable Network Intrusion Detection Systems Through Advanced Feature Engineering - **IEEE Xplore (11523882)**

PROJECTS

Stylique - AI Virtual Try-On Platform - Built a B2B engine delivering photorealistic virtual try-on and sizing recommendations.
Technologies: Next.js, Three.js, TypeScript, Supabase, Python, PyTorch, Stable Diffusion, Hugging Face, Shopify, TailwindCSS, Radix, Gradio

Finsync - A Financial Management Platform - Built a unified app to track all expenses and make payments across all banks via Plaid.
Technologies: Next.js, TypeScript, Appwrite, Plaid, Dwolla, React Hook Form, Zod, TailwindCSS, Chart.js

CoinSensei - A Secure USDT Buy/Sell App - Built a P2P trading platform for secure and seamless USDT transactions in Pakistan.
Technologies: React Native, Expo, Supabase, Python, Hugging Face, AWS, Blockchain Networks (Trc20 & Bep20)

QuickNoteAI - AI Note-Taking Web App - Built an AI note-taking app that summarizes notes and extracts key insights from videos.
Technologies: Next.js, TypeScript, Supabase, OpenAI API, Gemini API, TailwindCSS, Vercel

FacelessFlowAI - End-to-End AI Video Generator - Built a pipeline generating full AI videos with voiceovers, auto-published to YouTube.
Technologies: Next.js, Remotion, AWS Lambda & S3, Supabase, OpenAI, Gemini, ElevenLabs, Runway, Qwen TTS, Vercel, YouTube API

SniperBotAI - AI Trading System - Built an automated trading system where an AI model makes final trade calls, with full risk management.
Technologies: Python, MQL5, MetaTrader 5, AI/LLM APIs

Face Detection - Developed a real-time face detection tool that identifies skin tone, eye color, hair color and length, and glasses.
Technologies: Python, OpenCV, MediaPipe, Hugging Face

SKILLS

- C / C++ / C#
- Python
- Git
- Next.js
- React.js
- Three.js
- Node.js
- MongoDB
- MySQL
- PostgreSQL
- TypeScript
- JavaScript
- HTML / HTML 5
- CSS / Tailwind CSS
- .net
- AWS
- Google Cloud
- n8n / Zapier / ComfyUI
- LLM APIs / Agentic AI
- OpenCV / PyTorch / RAG
- Firebase / Supabase
- HuggingFace
- Vercel / Railway
- Selenium, Cypress, Playwright
- Postman / JMeter

CERTIFICATIONS & COURSES

- META Front-End Developer – 2023
- Unity Certified: Game Developer – 2024
- Amazon Cloud Foundation – 2024 & 2025
- ROS (Robot Operating System) - 2024
- Ethical Hacking - Mobile Platforms and Network Architecture
- IOT Bootcamp
- DeepLearning - AI for Everyone
- Google - Foundations of CyberSecurity
